

Ahmed Eid ElDesouky

Front-End React Developer

✉ ahmedeid.dev@outlook.com ☎ +201064766798 🌐 in/ahmedeid-dev 🐙 github/ahmedeid-dev

SUMMARY

Front-End React Developer with strong experience in React, TypeScript, and Redux. Specialized in building scalable dashboards and business web applications across logistics, POS, and ERP domains. Focused on clean, maintainable code, performance, and UI/UX best practices. Currently seeking a Front-End React role in a growth-oriented team.

EXPERIENCE

Front-end Developer | React

Accurate Smart Solutions

December 2024 - Present, Banha

- Developed and maintained responsive web applications and dashboards using React, TypeScript, and Redux.
- Collaborated with backend teams to integrate GraphQL APIs for Logistics, Freight, POS, and ERP software systems.
- Implemented state management solutions and Contributed to UI/UX improvements and reusable component design.

Front-End Developer | React

GoServ Ultimate Solutions

August 2024 -October 2024, Mansoura

- Developed user-friendly interfaces for various applications, including the Salla dashboard and Tailor dashboard.
- Collaborated with designers and backend developers to implement responsive and efficient web solutions.
- Designed and implemented user-friendly interfaces for a high-traffic e-commerce platform, increasing user retention by 25% through the use of React.js and ensuring compatibility across all major browsers.

Front-End Developer | React

Dr-Code Software Solutions

April 2024 - August 2024, Giza

- Participated in the implementation of user interfaces for various dashboards, including the NGO, Mwasla, and KSB Garage dashboards.
- Ensured responsiveness and optimal performance of applications across different devices and browsers.
- Conducted testing and debugging to maintain high-quality standards and improve user experience.

EDUCATION

B.Sc

Major in Information Systems • Banha University • Banha • 2021

CERTIFICATIONS

Full Stack Web development

Route It Training Center • 2023

- covering front-end (React, Next, TypeScript) and back-end (Node.js, Nest.ts, Express, MongoDB) technologies with a focus on real project.

SKILLS

Core &UI: React, Next, TypeScript, ES6+, HTML5, CSS3, SCSS, Tailwind CSS, MUI, Apollo Client.

State Management: Redux, Context API, React Query, Mobile-First Design.

Architecture: Component & Centralized System Architecture, S.O.L.I.D Principles.

Data Structures & Algorithms: Solid understanding and practical application in projects.

Other Tools & Technologies: Git, GitHub, RESTful APIs, GraphQL, i18next, Axios, Es Lint, Vite.

Backend Understanding & Practical Experience: Node.js, Express.js.

Soft Skills: Problem Solving, Bug Fixing, Team Collaboration, Continuous Learning, Agile Methodologies, Attention to Detail.
